DETAILED ACTION

Claims 1-10 are pending in the instant application. Acknowledgement is made of Applicant's RCE filed 5/17/02.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 1-10 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has amended claims 1 and 5 to include the limitations "and wherein the package prevents influence of the ring on the environment" and "thereby preventing influence of the intravaginal ring on the environment". However, the original specification states "The package should prevent influences from the environment...from affecting the vaginal ring. Furthermore the package should prevent the active substances present in the ring, from leaking to the environment" (page 1, lines 11-13). It is the examiner's viewpoint that the amendments to claims 1 and 5 do not correspond to the original specification.

It is suggested that the following language be used:

"and wherein the package prevents influences from the environment from affecting the vaginal ring." and/or "and the package should prevent the active substances present in the ring from leaking to the environment." (see the instant specification page 1, lines 10-13).
